

IN1621 - Web Technologies

CSS

Lab 03

Activity 01 - Create the Project and HTML File

1. Create a folder named CoffeeShop.
2. Create a file named index.html inside the folder.
3. Create an images folder.
4. Add three coffee images named coffee1.jpg, coffee2.jpg and coffee3.jpg.
5. Type the following HTML code in index.html.

```
<!DOCTYPE html>
<html lang="en">
<head>

    <meta charset="UTF-8">

    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>CoffeeShop</title>
</head>
<body>

    <h1 id="home">CoffeeShop</h1>

    <a class="top-link" href="#home">Home</a>
    <a class="top-link" href="#coffee">Coffee</a>
    <a class="top-link" href="#contact">Contact</a>

    <h2>Welcome to CoffeeShop</h2>
    <p id="intro">
        Enjoy freshly prepared coffee and a relaxing atmosphere.
    </p>

    <h2 id="coffee">Our Coffee</h2>

    <div class="coffee-item">
        
        <h3>Classic Cappuccino</h3>
        <p>A smooth espresso with steamed milk and foam.</p>
        <p class="price">Price: Rs. 850</p>
        <a class="order-link" href="order.html">Order Now</a>
    </div>

    <h2 id="contact">Contact Us</h2>
    <p>Email: info@coffeeshop.lk</p>
    <p>Phone: 011 234 5678</p>

    <hr>
    <p class="copyright">&copy; 2026 CoffeeShop</p>
</body>
</html>
```

1. Save index.html and open it in a browser.

Activity 02 - Apply Inline CSS

Complete the following questions using the style attribute inside the relevant HTML elements.

1. Change the CoffeeShop h1 text colour to brown.
2. Centre-align the h1 text.
3. Change the price paragraph colour to red.
4. Make the price text bold.
5. Apply a text colour to each Home, Coffee and Contact link.
6. Add a background colour and text colour to the Order Now link.
7. Save the file and check every change in the browser.

Activity 03 - Apply Internal CSS

Add a style element inside the head element and complete the following questions.

1. Apply a light background colour to the body.
2. Apply Arial or another readable font family to the page.
3. Style the h1 with white text, a dark background and centre alignment.
4. Apply padding to the h1.
5. Change the colour of all h2 headings.

Activity 04 - Create and Connect External CSS

1. Create a file named style.css inside the CoffeeShop folder.
2. Move all CSS rules from the internal style element into style.css.
3. Connect style.css to index.html using a link element inside the head element.

Activity 05 - Use Element Selectors

Write CSS rules in style.css to complete the following questions.

1. Use the body selector to set the page background, font family and text colour.
2. Use the h1 selector to style the main heading.
3. Use the h2 selector to style all second-level headings.
4. Use the p selector to change the line height of all paragraphs.
5. Use the img selector to set a suitable image width.
6. Use the a selector to remove the underline from all links.

Activity 06 - Use ID and Class Selectors

1. Use the #intro selector to add a background colour, padding and centre alignment to the welcome paragraph.
2. Use the .price selector to apply a colour, size and bold weight to the coffee price.
3. Use the .coffee-item selector to add a background colour and border around the coffee information.
4. Use the .top-link selector to add colour and spacing to the Home, Coffee and Contact links.
5. Use the .order-link selector to style the Order Now link.

Activity 07 - Use Universal and Grouping Selectors

1. Use the universal selector to apply box-sizing: border-box to all elements.
2. Use one grouping selector to apply the same colour to h1, h2 and h3.

Activity 08 - Apply Colours and Backgrounds

Complete the following questions using named, HEX and RGB colours.

1. Apply one named colour to a heading.

2. Apply one HEX colour to the page background.
3. Apply one RGB colour to the final copyright paragraph.
4. Add a background colour to each coffee item.
5. Add a suitable background image to the body or h1.
6. Test background-repeat and background-position values, then keep a suitable result.

Activity 09 - Format Text

1. Apply a readable font family and font size to the body.
2. Increase the font size and font weight of the h1.
3. Centre-align the h1 and h2 headings.
4. Remove the underline from all a elements.
5. Add suitable spacing between the links with class="top-link".
6. Add a hover colour to the top-link and order-link elements.
7. Change the line height of the description paragraphs.
8. Use a consistent text colour throughout the page.

Activity 10 - Style Images and Borders

1. Set a consistent width and height for the coffee images.
2. Use object-fit so each image fits the given size.
3. Add a solid border to each image.
4. Add rounded corners to each image.
5. Test dashed, dotted and double border styles, then keep one suitable style.
6. Add a different border around each coffee item.

Activity 11 - Apply Margin and Padding

1. Add padding inside the h1.
2. Add margin below each h2 heading.
3. Add margin outside each coffee item.
4. Add padding inside each coffee item.

Activity 12 - Complete the CoffeeShop Page

1. Copy the coffee-item div twice.
2. Use coffee2.jpg and coffee3.jpg for the new items.
3. Add different coffee names, descriptions and prices.
4. Apply the same coffee-item, price and order-link classes to all three items.
5. Display the coffee items in three columns on a wide screen.
6. Use a media query to display the coffee items in one column when the screen width is 600px or less.
7. Add a hover effect to every Order Now link.
8. Choose your own consistent colours, borders and spacing for the completed page.

Final Activity - Style the CoffeeShop Order Form Using External CSS

Question

Create order.html using the code below. Create form.css and use it to style the complete page.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="UTF-8">
  <meta name="viewport" content="width=device-width, initial-scale=1.0">
  <title>CoffeeShop Order Form</title>
  <link rel="stylesheet" href="form.css">
</head>
<body>

  <h1>CoffeeShop Order Form</h1>
  <a href="index.html">Back to CoffeeShop</a>

  <div class="page-container">
    <form>
      <label class="form-label required" for="fullName">Full Name</label>
      <input type="text" id="fullName" name="fullName" required>

      <label class="form-label required" for="email">Email</label>
      <input type="email" id="email" name="email" required>

      <label class="form-label" for="phone">Phone Number</label>
      <input type="tel" id="phone" name="phone">

      <label class="form-label" for="coffee">Coffee</label>
      <select id="coffee" name="coffee">
        <option value="cappuccino">Cappuccino</option>
        <option value="latte">Café Latte</option>
        <option value="mocha">Chocolate Mocha</option>
      </select>

      <p>Order Type</p>
      <div class="choice-group">
        <input type="radio" id="dineIn" name="orderType" value="dine-in">
        <label for="dineIn">Dine In</label>
        <input type="radio" id="takeAway" name="orderType" value="take-away">
        <label for="takeAway">Take Away</label>
      </div>

      <p>Extra Items</p>
      <div class="choice-group">
        <input type="checkbox" id="milk" name="extra" value="milk">
        <label for="milk">Extra Milk</label>
        <input type="checkbox" id="cream" name="extra" value="cream">
        <label for="cream">Whipped Cream</label>
      </div>

      <label class="form-label" for="message">Additional Information</label>
      <textarea id="message" name="message" rows="4"></textarea>

      <input type="submit" value="Submit Order">
      <input type="reset" value="Reset">
    </form>

  </div>
```

```
</body>  
</html>
```

Complete all CSS requirements below in form.css.

- Apply a pleasant background colour and a readable font to the webpage.
- Style the main heading and the **Back to CoffeeShop** link.
- Add a suitable width, background colour, margin, padding and rounded corners to the page-container.
- Style the text, email and telephone fields, selection list and textarea using a consistent width, padding, border and rounded corners.
- Display a red asterisk (*) after each label with class="required".
- Display the radio buttons and checkboxes horizontally with their labels and add suitable spacing.
- Style the **Submit Order** and **Reset** controls using background colours, white text, padding, rounded corners and hover effects. Use blue and dark blue for the normal and hover states of the Submit Order control.
- Add a focus effect to the form fields, selection list and textarea.
- Use a media query for screens 600px wide or smaller. Reduce the spacing, make the form fill the available width and allow the choices to move to the next line when necessary.
